

Lime Petroleum AS was established in 2012 and has since then participated in drilling six wells across the Norwegian Continental Shelf, making one technical oil/gas discovery in the Barents Sea and one likely commercial oil discovery in the North Sea. A horizontal well will be drilled next year to further appraise this unconventional basement reservoir on the Utsira High. Lime currently has interests in six licences and is looking to increase its presence through licensing rounds and transactions.

The organisation consists of currently 12 persons. In addition to Norway, the staff contributes to activities in Oman and West Africa. The office is located at Skøyen, Oslo.

## Senior Explorationist

---

The activities are increasing, and we are looking for a Senior Explorationist with a degree in geology or geophysics, and a broad background working in exploration from Norway and/or internationally.

We offer a small, positive and technically driven working environment with a competitive compensation package.

**Please submit your application by  
15 October to [mail@limepetroleum.com](mailto:mail@limepetroleum.com).**
